November 2026

Network Opportunities.

Bringing you the latest merger and acquisition opportunities.

As we head towards the festive break, the outlook for the M&A market remains cautiously optimistic, with buyer interest continuing to provide encouragement.

With the Autumn Budget now announced, and without any new policies to cause too much shock, but with interest rates seemingly on a gradually upward trend again, dealmakers will be considering how this affects their plans.

For business owners, the year-end can provide an opportunity to reflect on future plans, including whether a sale, succession or change in ownership may be on the horizon. Equally, buyers looking to expand through acquisition may be using this period to identify suitable businesses and build their pipelines ahead of the new year.

Against this backdrop, maintaining momentum and exploring potential opportunities now could help businesses and buyers position themselves favourably as the year draws to a close and preparations begin for the year ahead.

As always, this month's newsletter showcases our current businesses for sale, acquisition opportunities and deals recently completed across the CFN. Please get in touch if you are aware of any businesses which fit and feel free to share this newsletter with anyone else who may be interested.

We take a break with the newsletter in December, so look out for our next edition in January 2027.

Kirsty McGregor, Chairman
